Contents of Volume 41

Number 1, January 1982

John B. Goodenough and G. A. Fatseas. Mössbauer ^{57}Fe Isomer Shift as a Measure of Valence in Mixed-Valence Iron Sulfides 1

C. M. Plug. On the Relationship between the Structure of $CaFe_2O_4$ and Hollandite 23

J. Dexpert-Ghys, M. Faucher, and P. Caro. Lanthanum β-Alumina Phase Doped with Europium: Optical Investigation by Dye Laser Site-Selective Excitation 27

M. C. Cadée, D. J. W. Ijdo, and G. Blasse. Crystal Structure and Luminescence of Compounds $A_3BC_{10}O_{20}$ 39

B. Eiberger and M. Greenblatt. Rare-Earth-Substituted Chloro-Phosphate Apatites 44

J. C. Jumas, S. Del Bucchia, E. Philippot, et M. Maurin. Effet Mössbauer de ^{119}Sn dans les systèmes SnS–BaS et SnS–Tl_2S 50

H. Rebbah, J. Pannetier, and B. Raveau. Localization of Hydrogen in the Layer Oxide $HTiNbO_5$ 57

H. V. Kiran, K. Seshan, and D. K. Chakrabarty. The Influence of Ni^{2+} Ions on the Distribution of Mg^{2+} and Cu^{2+} Ions in Spinel Ferrites 63

C. Malard, H. Pezerat, P. Herpin, et P. Toledano. Structure et stabilité thermique des deux formes du formiate de magnesium dihydraté 67

R. T. Tuenge and L. Eyring. On the Structures of the Intermediate Phases in the Terbium Oxide System 75

H. L. Sanchez, H. Steinfink, and H. S. White. Solid Solubility of Ge, Si, and Mg in Fe_2O_3 and Photoelectric Behavior 90

J. C. J. M. Terhell, V. A. M. Brabers, and G. E. van Egmond. Polytype Phase Transition in the Series $GaSe_{1-x}S_x$ 97

J. S. Swinnea, G. A. Eisman, T. P. Perng, N. Kimizuka, and H. Steinfink. The Crystal Structure of "$Ba_2Fe_4S_5$": A Two-Dimensional Array of FeS_4 Tetrahedra 104

Erratum

Volume 39, Number 2, September 1981, Eiji Takayama and Noboru Kimizuka, "Powder X-Ray Study on Iron–Germanium Pyroxenes, pp. 262–264..... 109

Number 2, February 1982

Harry Nyman. A Structural Relationship between Sr_6Mg_{23} and $SrMg_4$ 111

J. S. Swinnea and H. Steinfink. The Phase Relationship among Compounds $Ba_{1+x}Fe_2S_4$ 114

J. S. Swinnea and H. Steinfink. Mössbauer Spectra, Magnetic and Electrical Behavior of $Ba_{1+x}Fe_2S_4$ Phases 124

T. Ishiguro, N. Ishizawa, N. Mizutani, and M. Kato. High Temperature Structural Investigation of the Delafossite Type Compound $CuAlO_2$ 132

A. WATANABE, Y. SEKIKAWA, AND F. IZUMI. An Outline of the Structure of New Layered Bismuth Lanthanum Tungstate, $Bi_{2-x}La_xWO_6$ ($x = 0.4–1.1$) 138
S. J. CLARK, J. D. DONALDSON, AND D. R. LAUGHLIN. Studies on the Effects of Doping Cesium Metal(III) Halides of the Type $Cs_3M^{III}_2X_9$ (M^{III} = Sb or Bi, X = Cl or Br) 143
R. FARHI, G. PETOT-ERVAS, C. PETOT, G. DHALENNE, AND F. LE GUERN. Experimental Study of Gases Occluded within Microscopic Cavities in Single Crystalline Nickel Oxide 147
A. DURIF, M. T. AVERBUCH-POUCHOT, AND J. C. GUITEL. $(NH_4)_4P_4O_{12} \cdot 2Te(OH)_6 \cdot 2H_2O$, the First Example of a Tetrametaphosphate-Tellurate 153
AKITERU WATANABE. Polymorphism in Bi_2WO_6 160
NOBORU KIMIZUKA AND EIJI TAKAYAMA. $Ln(GaM^{2+})O_4$ and $Ln(AlMn^{2+})O_4$ Compounds Having a Layer Structure [Ln = Lu, Yb, Tm, Er, Ho, and Y, and M = Mg, Mn, Co, Cu, and Zn] 166
P. COLOMBET, A. LEBLANC, M. DANOT, AND J. ROUXEL. Structural Aspects and Magnetic Properties of the Lamellar Compound $Cu_{0.50}Cr_{0.50}PS_3$ 174

AUTHOR INDEX FOR VOLUME 41 338

The Subject Index for Volume 41 will appear in the December 1982 issue as part of a cumulative index for the year 1982.

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of this or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Manuscripts should be submitted to the Editor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5×28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $25.00 for up to 98 pages of standard-size or 49 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. ____ for ____ pages of supplementary material. Order from ASIS/NAPS, Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, NY 10163. Remit in advance $4.00 for microfiche copy or for photocopy, $7.75 up to 20 pages plus $.30 for each additional page. All orders must be prepaid. Institutions and Organizations may order by purchase order. However, there is a billing and handling charge for this service of $15. Foreign orders add $4.50 for postage and handling, for the first 20 pages, and $1.00 for additional 10 pages of material. $1.50 for postage of any microfiche orders.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5×28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
